## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claim 1, drawn to a first alkaline dry cell, classified in class 429, subclass 185.
  - II. Claims 2-4, drawn to a second alkaline dry cell, classified in class 429, subclass 178. <sup>12, 13, 14</sup>
  - III. Claims 5-7, drawn to a third alkaline dry cell, classified in class 429, subclass 175. <sup>15, 16, 17</sup>
  - IV. Claims 8-11, drawn to a fourth alkaline dry cell, classified in class 429, subclass 211. <sup>18, 19-21</sup>
2. The inventions are distinct, each from the other because of the following reasons: Group I includes the limitation that the external can is made thinner than 0.18mm, which limitation is not part of any of the other Groups II-IV. Group III includes a metal plate comprising a terminal face, which face has a protruding shape along with a circumferential flange face surrounding the terminal face, which feature is not part of either Group II or IV. Finally, Group IV comprises an alkaline cell having an anti-explosion portion formed on a sealing member of the battery can, which limitation is not part of the Group III cell.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their different classification and recognized divergent subject matter, restriction for examination purposes as indicated is proper.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
